### Red Runner Dampening Sleeves

The advanced fiber technology sets Red Runner apart from other dampening sleeves by providing the ultimate in slip-on, shrink fit design. Its unique fiber system delivers unprecedented control of ink/water balance. Unlike cumbersome rigid tubes, Red Runner Dampening Sleeves are conveniently packaged, six to a case, in small, easy to store containers. Available in a full range of sizes.

Fiberweb™ THE PRODUCTIVITY EXPERTS.

## Why Red Runner Dampening Sleeves are GOOD FOR YOUR SHOP:

- **Better Runs**—No low spots or mourning bands, and issues with critical roller tolerances are eliminated.
- **Pattern Free**—Consistent and ultra-fine surface provides optimum water control and achieves a new level of pattern-free printing performance.
- **Durable and Reliable**—These long lasting sleeves won't break, crack, split or shred. They clean up easily and are lint-free.
- **Versatile**—Can be effectively used as a replacement for rigid tube dampening sleeves, may be installed on oversized bareback rollers or used as a top (outer) cover going directly over an existing fabric cover, eliminating lint and pattern.

## YOU PUT THE PRO IN PRODUCTIVE!

As the productivity experts, our goal is to help the PRO maximize productivity. We are here to serve and help you – The PRO.

Fiberweb provides you with top quality, high-performance professional products for all areas of your printing company - prepress, pressroom, sheet-fed and web - all to help increase your productivity.

Our goal is simple; provide the PRO with partnership and productive products!
